Chief, S/COM

Specific Requirements -- Hungary

1. Hungarian plans for the period 1956 - 1960 call for a 30 percent expansion of the telecommunications network. A part of this expansion is to be in the form of microwave radio relay facilities. The following requirements are based upon the annexed plan.

- a. Where are the microwave radio relay facilities to be installed?
- b. What type of equipment is to be used at the radio relay installations?
 - (1) How many carrier frequency telephone channels are to be provided by the terminal equipment?
 - (2) Will the system accommodate video signals?
 - (3) What frequency band will be used?
 - (4) What is the cost of the radio relay equipment, including installation?
 - (5) What is the cost of the terminal carrier frequency telephone equipment?

2. Information of the type requested may be obtained from top level officials of the Ministry of Communications or the Belainies Telecommunications Factory.
